PROJECTS

ShopEase

3/2023 - 5/2023

Individual

YOUR POSITION IN PROJECT FULL-STACK DEVELOPER

https://github.com/quangzeros/shopApp

An online marketplace that allows individuals to sell their personal items to other users.

TECHNOLOGY DESCRIPTION

- · Built by Express, Nodejs, MongoDB
- The platform enables sellers to easily upload product details, set prices, and manage their listings.
- Buyers can browse, search, and purchase items from different individual sellers.
- The admin panel allows platform managers to oversee transactions, and ensure a smooth user experience for both buyers and sellers.
